Made For Outdoor Life.

FABRIC PERGOLAS

Exploring the Beauty of **FABRIC PERGOLAS**

Retractable PVC roof pergolas offer a modern and functional solution to transform your outdoor area into a dreamlike living space. With stylish designs and durability, they provide numerous advantages to enjoy every season and weather condition to the fullest.

These versatile structures offer sun and rain shelter, can endure winds up to 117 km/h, and can easily convert into cozy homey, watertight living spaces with the addition of side enclosures.

The world of retractable pergolas is your canvas for creativity. Here, you have the freedom to craft every detail, whether it's the size, shape, materials, or colors, to harmonize with your distinctive outdoor dream. Your vision, your design.

Roof

SATIN S

With its flat roof style, Satin S seamlessly complements any architectural structure and provides all the comfort you require in an elegant, clean appearance.

EXPANDED POSSIBILITIES

Retractable PVC ceiling with aluminum construction transforms outdoor areas into usable indoor spaces year-round, enhancing comfort and elegance with various customization options.

ADAPTABLE TO ANY BUILDING STRUCTURE

Can be perfectly integrated with your structures and surrounding space with its flat ceiling shape.

TRAPEZIUM FABRIC

Thanks to the slope of the trapezium fabric hidden in the 36cm high horizontal profile, Satin S provides a protection against rain and sun.

THE SATIN S PERGOLA MODEL FEATURES A FLAT ROOF DESIGN.

All models are freestanding and has two sub-models based on the number of fabric systems on the ceiling, namely single and double.

Satin S-Single

This self standing unit includes 2 rails for carrying the pvc fabric, drains the water on one side of customer choice.

Satin S-Double

This self standing unit includes 3 rails for carrying the PVC fabric, water flow towards on both sides of the pergola system.

The charm of Satin S pergolas lies in their ability to be customized according to your exact needs. Create an outdoor haven that mirrors your uniqueness by selecting from a wide range of color or design options and accessories.

TECHNICAL SPECIFICATION

THE COMPACT REVOLUTION

DELICATE DESIGN, DYNAMIC LIVING

Compact models are retractable roof system with an aluminium structure. Thanks to its special profile design, this option can be preferred for small spaces, offering a delicate structure and appearance.

*This features is not compatible with flat roof pergola systems (SATIN S)

MAXIMUM DIMENSIONS

The compact version has a maximum opening measurement of 600 cm, and the maximum dimensions of the width and front pillars are the same as those of the standard series, modular structure and options.

GEOMETRIC CROSS SECTION

With its geometric design, the specially engineered inner section gives maximum strength and wind resistance to the aluminium rail profile.

ELEGANT DESIGN

Palmiye Pergola's aesthetic appearance offers the best for those who desires elegance and perfection.

HIDDEN ASSEMBLY

Fabric pergolas series provide a clean surface and perfect view by concealing all connection details made with stainless steel screws and parts.

HORIZONTAL BEAMS

The front and side beam on the same horizontal level, giving a continuous line throughout the product, ensuring a smooth relaxing overall look, which is a delight to the eye.

*Doesn't include the compact series.

SEPARATE GUTTER PROFILE

The gutter with its height adjustment feature, provides the anti-air system, in different positions to ensure a perfect fit, according to the inclination of your product.

WATER DRAINAGE AND SEALING

The hidden part of the drainage system which was ingeniously integrated inside both beams and pillars makes effortlessly possible the discharge of water.

DOUBLE ANTI AIR SYSTEM & WATERBLOCK

Double anti air system blocks wind from entering between the ceiling cover, rails, and gutter, creating an airtight space. Waterblock prevents rain from entering the area, directing it to the front gutter for ideal drainage.

MODIFIABILITY

Allows modifications on the main constructions by changing the main aluminium beam and pillars with steel. Provides a flexibility to remove the middle pillars by performing optional system changes. Pillars have the ability to shift up to 50 cm according to the structural needs of the project.

MODIFIABILITY

Freestanding products use base plates, while wall-mounted options utilize stainless steel base connections. Hidden anchorage is also available upon request. Models without a water outlet are also available for all options.

PROFILE CAP CHOICES

Give a personal touch to your pergola by choosing from a rounded or straight ended cap.
